WHY HIRE ME

I don't just design screens — I solve product problems. With hands-on experience shipping two end-to-end UX projects, I've proven I can take a blank page from user research all the way to a tested, interactive prototype. My work on MuscleX (a fitness app) reduced navigation confusion by restructuring the core user flow after identifying 3 key pain points in user analysis. Beyond UX, I bring strong graphics design skills — crafting visual identities, brand assets, and compelling visuals that communicate with impact. I bring user-centered thinking, sharp visual execution, and a relentless hunger to grow — fast.

PROJECTS

MuscleX — Fitness Mobile App | UX Research → Wireframe → Prototype 🕒 34 days

- ▶ Conducted user research to uncover 3 friction points in workout tracking; redesigned core flow, cutting task completion steps by ~40%.
- ▶ Built structured wireframes mapping 8+ app screens, establishing a consistent layout language before any visual design began.
- ▶ Delivered an interactive prototype applying visual hierarchy, spacing, and typography systems — achieving a cohesive, gym-ready aesthetic.
- ▶ Leveraged AI ideation tools to speed up concept exploration by an estimated 30%, maintaining quality under a tight 34-day timeline.

Furniture E-Commerce Website | Responsive UI/UX Design 🕒 25 days

- ▶ Designed a fully responsive layout from scratch — tested across 3 screen sizes (mobile, tablet, desktop) with zero layout-breaking issues.
- ▶ Applied typographic hierarchy, consistent component spacing, and a curated color palette to elevate the brand's perceived quality.
- ▶ Structured intuitive navigation that reduced product discovery depth to 2 clicks from the homepage.
- ▶ Delivered the complete design 3 days ahead of the self-imposed deadline, allowing a full review and polish cycle.

SKILLS & COMPETENCIES

UX Process

- ▶ User Research & Pain-Point Analysis
- ▶ Wireframing (low → high fidelity)
- ▶ Interactive Prototyping
- ▶ Usability Heuristics & Testing

Visual & Technical

- ▶ UI Design Systems & Component Libraries
- ▶ Responsive Web Design (HTML & CSS)
- ▶ Typography, Color Theory, Visual Hierarchy
- ▶ AI-Assisted Design Ideation

EDUCATION & TRAINING

UI/UX Design Course

Frame Box 2.0, Kalyan

SSC — Safiee Jamali High School

Score: 45.85% | Mumbai

Open to full-time, freelance, and internship roles in product-focused UX teams.
