Case study-MUSCLEX Your strenght,Every day

By taher mangal mahudi

MUSCLEX

MUSCLEX Enhance your strenght,Every day

Project overview

The My MuscleX Application is a fitness-focused mobile application designed to help users track workouts, build muscle, and maintain a healthy lifestyle. This case study analyzes the application's concept, features, user interface, and overall user experience to evaluate its effectiveness in supporting fitness and muscle-building goals.

Problem statement

Many gym users and fitness enthusiasts face confusion while choosing the right gym supplements for muscle growth, recovery, and overall fitness. Due to a lack of proper guidance, users often rely on unreliable sources, misleading marketing, or incomplete information, which can lead to incorrect supplement usage and ineffective results.

Beginner pain points

- Lack of knowledge about gym supplements and their benefits
- Confusion about which supplement to use for muscle gain or recovery
- Difficulty trusting online supplement information

Intermidiate pain points

- Lack of advanced, goal-based supplement recommendations
- Unclear information about supplement timing and cycling

Possible solution

Design a guided, trustworthy, and goal-based supplement experience that helps beginners and intermediate gym users confidently choose, understand, and use supplements correctly.

🧩 Solutions for Beginner Pain Points

Problem: Lack of knowledge about gym supplements and benefits
Solution:
- Goal-based onboarding (Muscle Gain / Fat Loss / Recovery)
- Simple questions (age, experience level, workout frequency)

Problem: Unclear information about timing and cycling
Solution:
- Clear dosage guidance (pre-workout, post-workout, rest days)
- Daily reminders & usage schedule
- “Do & Don’t” section for beginners

🧠 Solutions for Intermediate User Pain Points

Problem: Lack of advanced, goal-based supplement recommendations
Solution:
- Personalized supplement stacks based on:
  - Training intensity
  - Body goal
  - Recovery needs

roblem: Confusion between multiple supplement options
Solution:
- Side-by-side supplement comparison
- Highlight key differences (benefits, usage, timing)
- “Best for muscle gain / recovery” tags

Quantitative analysis/survey

This quantitative analysis is conducted using a Google Form to collect structured and measurable data from users. The form includes close-ended questions such as Yes/No and multiple-choice options to ensure consistency and easy analysis. The goal is to understand user behavior, preferences, and pain points based on numerical responses

Questions:

- **Do you reply on friends, advertisements, or social media for supplement advice**
- **Have you ever wasted money on the wrong or ineffective supplements?**
- **Do you feel confused while choosing gym supplements?**
- **Would you prefer personalized, goal-based supplement recommendations in an app?**
- **Would you trust a mobile app for supplement guidance and recommendations?**
- **Do you feel more confident in choosing supplements after using a guided app?**

Qualitative analysis

I conductio 3+ interview to understan their experience with musclex application.

- Can you describe your overall experience using the MuscleX app?
- What was the first thing you noticed when you started using the app?
- Which feature did you find most useful, and why?
- Was there anything in the app that confused you or felt unclear?
- How easy or difficult was it to find workout and supplement information?
- Did the supplement recommendations feel relevant to your fitness goals?
- How confident did the app make you feel about choosing the right supplements?
- Can you describe how the app fit into your daily fitness routine?
- What part of the app did you use the most during your time with it?
- Was there any moment where you felt stuck or unsure what to do next?

- **How does MuscleX compare to other fitness or supplement apps you've used?**
- **What features did you expect but didn't find in the app?**
- **What would motivate you to continue using MuscleX long-term?**
- **What improvements would make the app more helpful for you?**
- **If you recommended MuscleX to a friend, how would you describe it?**

User persona

Ramandeep Patel

Dedicated researcher with specific needs

Age:

27

Identifying gender

Male

Bio

Ramandeep was born in US, his parents moved to California in 1990's from Delhi. He's a computer geek and crypto ambassador. Raman looks after his body and his appearance, goes to gym and eats healthy food. He loves not only dumbbells and barbells but also cross-fit.

Goals

1. Gain muscles
2. Customise workouts
3. Build own schedule
4. Track results
5. Save time during training
6. Improve excercise technics
7. Combine gym excercises with video workouts

Motivation

1. Get desired features
2. Read reviews and get the best

Location
Sunnyvale, CA

Family status
Single/No kids

Occupation
Tech startup CTO

Devices
iPhone 13 Pro Max
Macbook Pro 16"
Apple Watch series 7

3. Customize everything

Pain points

1. Having to spend too much time doing research on products
2. Finding the absence of pro features such as adding the number of weignt, sets and reps for each excercise, rest time etc.
3. Wasting money and time when a product doesn't work out for him
